

## **AMENDMENTS TO THE ABSTRACT**

Please replace the Abstract with the following amended Abstract:

### **Abstract**

~~The present invention provides for a~~ A cutting device cuts and associated method to cut one or more downhole control lines such that the cut ends of the one or more control lines will not interfere with subsequent fishing operations. The cutting device comprises a mandrel, a cutting sleeve and a housing supported on a tubing. Movement of the tubing induces relative motion of the cutting sleeve to cut the one or more control lines.
